

Tick Removal

Apply liquid soap to a cotton ball.

Cover the tick with the soap-soaked cotton ball.

Swab it for 20 seconds.

The tick will come out on its own and be stuck to the cotton ball when you lift it away.

This technique works every time, and it's much less traumatic for the patient.

NEVER use tweezers, NEVER try to pull them off your body: the head can detach, and that's a VERY bad thing...
